PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years of experience architecting scalable SaaS platforms, high-performance web applications, and reusable design systems using Next.js, React, and TypeScript. Skilled in frontend architecture, performance optimization, and REST API integration, with a strong focus on scalability, accessibility, and maintainability. Proven ability to lead complex features end-to-end and collaborate with cross-functional teams to ship production-grade applications.

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer • Wittify.ai

Feb 2025 – Present | Hybrid

- Lead frontend architecture for a SaaS product suite including the main dashboard, marketing site, and an embeddable chat widget library.
- Build end-to-end features using Next.js, React, and TypeScript, and develop a reusable component library with Tailwind CSS and shadcn/ui.
- Design an iframe-based live preview architecture using postMessage for real-time configuration between the dashboard and embeddable widget.
- Integrate complex REST APIs including authentication, billing (Stripe), conversations, leads, and ticketing systems.

Senior Frontend Engineer • Jobzella

Jan 2024 – Feb 2025

- Developed and maintained jobzella.com and its admin dashboard using Next.js and React, serving job seekers and recruiters across the MENA region.
- Implemented responsive, accessible UIs and improved client-side performance through code splitting, image optimization, and efficient state management.
- Refactored legacy components to modern React patterns, reducing technical debt and improving maintainability.

Frontend Engineer • Kick Start Interactive

Feb 2023 – Jan 2024

- Built the Aqar Map admin dashboard with React and Ant Design, including interactive maps and responsive admin interfaces for Egypt and Saudi markets.
- Contributed to a Laravel-based ERP system: refined the frontend UI and optimized mobile views for better cross-device experience.

Frontend Engineer • Mophx

Jan 2021 – Jan 2023

- Developed responsive, accessible UIs and reusable components using React and Vue.js for multiple client projects, improving mobile performance and cross-browser compatibility.

TECHNICAL SKILLS

Languages TypeScript • JavaScript (ES6+) • HTML5 • CSS3 • SCSS

Frameworks Next.js (App Router, SSR/SSG) • React • Vue.js

State Management Redux • Redux Toolkit • Zustand • React Query (TanStack Query)

Styling & UI Tailwind CSS • shadcn/ui • Material UI • Radix UI • Bootstrap

Architecture SOLID Principles • Component-Driven Development • Responsive Design • Web Accessibility (WCAG)

Performance Code Splitting • Lazy Loading • Bundle Optimization • Core Web Vitals

Integration REST API Integration • Authentication (NextAuth) • iframe & postMessage

Tools & Workflow Git • GitHub • Agile/Scrum • Code Reviews • CI/CD
